

# Nodagala Govardhan Gowtham

9398685695 | 2400080181aids@gmail.com | linkedin.com/in/gowtham | github.com/gowtham5695

## SUMMARY

---

Artificial Intelligence and Data Science student with knowledge of **Python, Java, Machine Learning fundamentals, and web development**. Experienced in developing academic projects including **AI chatbots, web applications, and data structure implementations**. Interested in applying **AI, data analysis, and software development concepts** to solve real-world problems. Seeking internship opportunities to improve technical and problem-solving skills.

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java

**AI & Data Science:** Machine Learning Fundamentals, Natural Language Processing (NLP), Data Analysis

**Web Development:** HTML, CSS, React

**Backend Development:** Java, Spring Boot (Basics), REST API Concepts

**Databases:** MySQL, PostgreSQL, MongoDB

**Cloud Computing:** AWS Cloud (Basic Usage)

**Libraries:** NumPy, Pandas, Scikit-learn

**Computer Science Concepts:** Data Structures, Algorithms, Object-Oriented Programming

**Tools:** Git, GitHub, VS Code, Eclipse, Jupyter Notebook

## PROJECTS

---

### SAARA Voice Assistant – Multilingual AI Chatbot

*Python, NLP*

*Personal Project*

- Developed a multilingual AI chatbot capable of interacting in English and Telugu
- Implemented document summarization and conversational interaction features using NLP techniques
- Focused on improving accessibility and information retrieval from website documents

### Teachers Lesson Plan Architect – Lesson Planning Web Platform

*Web Technologies*

*Hackathon Project*

- Designed a platform to help teachers generate structured lesson plans
- Organized objectives, activities, and assessments into a systematic workflow
- Improved lesson planning efficiency using web-based automation

### Peer Review Platform – Collaborative Web Application

*HTML, CSS, React*

*Frontend Project*

- Developed a collaborative web platform enabling peer review and feedback sharing
- Designed responsive user interfaces for submitting and reviewing content
- Implemented modular components using React

### Bank Management System – Python Banking Simulation

*Python*

*Console Application*

- Developed a console-based banking system supporting account creation and transactions
- Implemented deposit, withdrawal, and balance tracking features
- Applied modular programming and control structures

### Undo-Redo Operations using Stack Data Structure

*Python*

*Data Structures Project*

- Implemented undo and redo operations using stack data structures
- Demonstrated practical use of stacks in application workflows
- Strengthened understanding of algorithms and program logic

## HACKATHONS & COMPETITIONS

---

**HackWithAI – 24-Hour AI Hackathon**

*KLH Bachupally ACM Student Chapter*

- Participated in a 24-hour AI hackathon focused on building innovative AI-based solutions
- Collaborated with team members to brainstorm and prototype AI ideas
- Gained experience in teamwork, rapid development, and problem solving

2026  
KL University

## EDUCATION

---

**KL University**

*Bachelor of Technology in Artificial Intelligence and Data Science **CGPA: 9.06***

**SR Junior College**

*Intermediate (MPC) **Percentage: 79.1%***

**Holy Angels E.M. School**

*SSC **Percentage: 85%***

Vijayawada, India  
*Jul 2024 – Present*  
Rajahmundry, India  
*Jun 2022 – Apr 2024*  
Kovvuru, India  
*Jun 2021 – Apr 2022*

## CERTIFICATIONS

---

- Cambridge Linguaskill Certification (English Proficiency)
- Microsoft GitHub Foundations Certification (GH-300)
